

BILSTEIN® SHOCK ABSORBERS

More Miles for Your Money...

While some experts may suggest that you change your shocks every 50,000 miles, we would like to suggest you simply change your brand of shocks.

Conventional shocks slowly lose efficiency and eventually fail over a period of time causing excessive tire, steering and suspension component wear. However, Bilstein engineers design our monotube gas pressure shocks and struts to continue to perform well beyond other manufacturers' recommended replacement, and deliver optimum performance for life. In fact, we have drivers reporting to us up to 600,000 miles of dependable service.

Considering these will probably be the last shocks or struts you'll ever have to put on your vehicle, with Bilstein you definitely get a lot more miles for your money.

See the full line of Bilstein shocks & struts on our website, or call toll free for the Bilstein retailer nearest you.
