

# Eliminate a Whole Lotta Shakin'

***While a stable, wiggle-free ride may not make your dashboard dancer happy, it will make for a more enjoyable trip for you.***

Bilstein monotube gas pressure shock absorbers virtually eliminate the excessive sway, bouncing and general wallowing down the road associated with conventional shocks. Driving a Bilstein equipped coach is truly an enjoyable experience. Unbelievable control. Exceptional stability. Incredible comfort.

The huge self-adjusting digressive working piston inside a Bilstein shock instantly reacts to changing suspension input and adjusts for any road condition. Along with Bilstein's superior monotube design, this provides maximum vehicle body motion control while maintaining superior comfort.

Treat yourself to the best...install a set of Bilstein shock absorbers and start enjoying the wiggle-free ride.

***Stop by and see us at the FMCA Convention this August in Redmond, OR.***
