

The World Leader in Monotube Gas Pressure Shock Technology

# BILSTEIN<sup>®</sup> SHOCK ABSORBERS

*Just think of Bilstein as one of the founding fathers of the dirt nation. We were first to introduce the incredible performance advantage of monotube gas pressure shocks over 50 years ago and still lead the way today. Our off-road racing performance is legendary. And every shock we build is filled with the knowledge we've gained from decades of crossing the finish line first. From O.E. replacement to professional racing applications, there's a Bilstein shock absorber made for it.*

**Leading Technology...Winning Performance...Superior Selection...**

**4600 Series**  
Original equipment replacement for pickups and SUVs

**5100 Series**  
Superior on and off-road performance designed specifically for lifted pickups and SUVs
