

Consumers at the Nürburgring benefit from successful partnership

Black Falcon and BILSTEIN offer competent, personalised advice to ambitious sporty drivers at their RACEBOX service centre on the North Loop. The concept of the Racebox, i.e. direct contact to the customer at the racetrack, has now been running very successfully for a good year, thanks first and foremost to the partner and operator of the BILSTEIN Racebox, the current VLN champion team and sports car experts Black Falcon. For the customer the greatest benefit is being given personalised advice from the experienced Black Falcon team, which has over 30 class victories in the VLN, plus the 24 hr races at the Nürburgring and in Dubai, to its credit.

In addition to providing advice tailored to individual requirements, looking at all makes of vehicle, and in-depth technical discussions, the aim of the co-operation between Black Falcon and BILSTEIN is also to give customers the chance to experience a perfectly co-ordinated suspension on asphalt. BILSTEIN's partnership with the motor sports company Black Falcon makes this option possible. The racing team with its Porsches and BMWs is also permanently based at the Nürburgring. Some of Black Falcon's models displaying different fitting options are on view there and are available for test rides with a driver on request.
